## HOW TO USE THIS CARD

### Four steps

1. Check the nine payouts on the machine against the front of this card. A multi-denomination machine can change payable when you change the denomination.
2. Bet five coins. Every return here assumes it; fewer cuts the royal to a fifth and costs about 1.4% of everything you put in.
3. Go down the front from line 1. Stop at the first line your five cards can make, hold exactly those, and draw.
4. If a line fits two ways, take the one with more high cards; if that ties, the lower cards. Q-J makes more straights than A-K.

### The two terms

High card means J, Q, K or A — the ranks that pay when they pair up.

Completes N ways counts the ranks that finish a straight. Two ways is open at both ends: 4-5-6-7 takes a 3 or an 8. One way is a gutshot, and so is A-K-Q-J.

### What this card is worth

Followed exactly, this card returns 99.2823% of everything you bet on 300/20/12/10/4/4/3, against 99.5123% for perfect play. It gives up 0.2300 points — one five-coin bet every 435 hands, or \$1.72 an hour at quarters and 600 hands an hour.

No exceptions and no footnotes: a line earned its place or it is not here, which is why that is one number and not a range. Measured, not simulated, over all 2,598,960 deals against a solved table of every Deuces Wild hand.

Also correct for 9 other paytables, each with its own measured return, listed at [bitsandodds.com/video-poker/cheat-sheet/](https://bitsandodds.com/video-poker/cheat-sheet/)

- 2 to a flush
- 3 to a flush
- 1 to a royal flush
